Bins and silos

a storage solution built to meet your requirements

At **qoncept**, we provide end-to-end support for our clients, from basic engineering and manufacturing to the final erection of our **silos**.

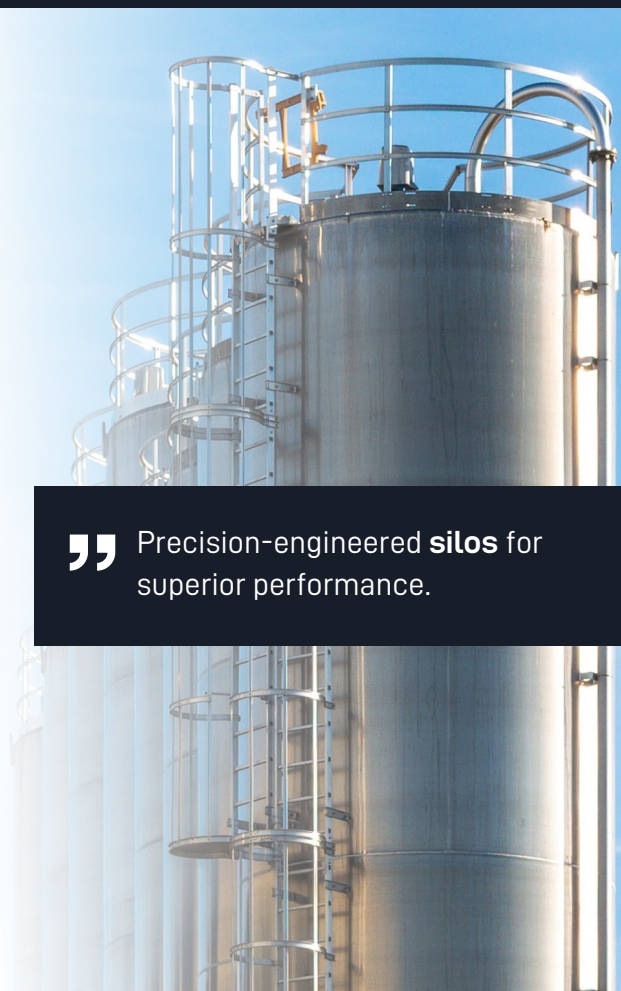

While simple in structure, our silos and hoppers are versatile and designed for a wide range of materials, making them ideal for various industries, including:

- **Steel Industry:** Handling materials such as coal dust, lime, and fly ash.
- **Glass Industry:** Perfect for storage, dosing, and mixing processes.
- **Stone and Earth:** Suitable for gravel, rock, sand, and more.
- **Wood Industry:** Designed for materials like wood pellets.
- **Concrete, Mortar, Lime, and Gypsum:** Reliable for construction applications.
- **Fertilizers and Grains:** Efficient storage and handling solutions.

” Silos are more than just storage—they are the backbone of progress and efficiency. At **qoncept**, we ensure they protect the resources that power our economy.

Product Highlights

- Comprehensive support is provided from engineering, manufacturing, transport and logistics, up to final erection.
- Material feeding hoppers are designed to meet specific requirements.
- Pressure tanks are built according to the AD 2000 standard and can handle pressures up to 10 bar.
- Crude and pure gas piping ranging from Ø400 mm to Ø3,000 mm.
- Platforms and other steel structures are engineered for stability and durability.
- Complete solutions include associated components such as edge railings, access ladders with back protection cages, and injection lines with pinch valves for truck filling.
- Additional accessories can be supplied based on customer requirements, including fill level detectors, electromechanical pressure detectors, filters, gate and rotary valves, discharge screws, vibrobottoms, and burst discs.

” Precision-engineered **silos** for superior performance.

Our References

Delivering perfection in every project

COUNTRY	STORAGE MATERIAL	SIZE
AUT / FRA	Hydrated lime	80 m ³
AUT	Talc	2 x 112 m ³
AUT / CH	Pellet dust	60 x 80 m ³
AUT / DEN	Cement	20 m ³
AUT / GER	Hydrated lime	30 m ³
AUT / FRA	Bicarbonate	60 m ³
AUT / FRA	Residuals	200 m ³
AUT / FRA	Hydrated lime + Coal	80 m ³ + 10 m ³
BEL	Pressurized media	6 m ³
AUT / FRA	Ash	140 m ³

With over 30 years of expertise in products and processes, our team has been actively involved in a wide range of construction sites worldwide.

Now representing **qoncept**, here are our references since 2020:

20+
Silos

in

8
Countries

Smart storage solution for a wide range of applications and industries

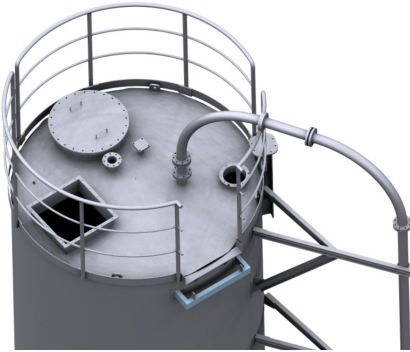

Complete solution tailored to fit your specific needs and requirements

A holistic approach, from engineering and design to manufacturing end erection.

Our Services

Engineering & Manufacturing

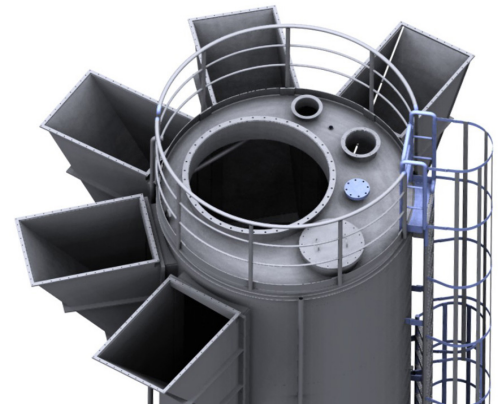

Our qualified engineers handle all necessary work, including:

- Creating verifiable structural analyses
- Developing 3D models
- Producing manufacturing and assembly drawings with parts lists

Together with our manufacturing partners, we produce components in accordance with EN1090.2.

Transport & Erection

We, at **qoncept**, handle all the required logistic and take care of the transport to the construction site. Our team carries out the final erection of the silos and installs the additional accessories and equipment.
